

Recombinant SARS-CoV-2 Nucleocapsid Protein

Recombinant SARS-CoV-2 Nucleocapsid Protein, derived from insect cells.
CODE: 244-10002

Product Specifications

Size:	1 mg, 5mg, or 10 mg
Format:	Liquid
Formulation:	Presented as purified antigen in 50mM HEPES/NaOH, pH 8, containing 150mM NaCl and 10% glycerol.
Concentration:	mg/ml by absorption at 280nm.
Purity:	> 95%
Purity determined by:	By chromatography.
Recommended Applications:	Suitable for ELISA assays and similar solid phase formats.

Source

Species:	SARS-CoV-2
Protein Name & Synonyms:	Nucleocapsid Protein, N Protein

Preparation

Expression System:	Insect cells
Conjugation/Tag:	C-terminal
Molecular Weight (kDa):	47

SDS-PAGE Image

Lane 1: Protein Molecular Weight Marker (kDa)

Lane 2: Recombinant SARS-CoV-2 Nucleocapsid Protein

Stability & Storage

Storage/Stability

-70°C. Avoid repeated freezing and thawing.

The products are furnished for **LABORATORY RESEARCH USE ONLY**. Not for diagnostic or therapeutic use.
