

Lucigen Competent Cells

Choosing the right cells for your cloning and protein expression applications will directly impact the time and effort required for your project as well as its success. Our partner Lucigen offers the best performance, value and convenience in competent cells for cloning and expression.

Chemically Competent Cells offer an unmatched value for routine cloning, and Electrocompetent Cells provide the highest possible efficiency for difficult cloning and library construction. In addition, Lucigen has developed a variety of Competent Cells for Protein Expression with unsurpassed performance. Bulk quantities and/or custom packaging are available for all Lucigen Competent Cells.

Features of Lucigen Competent Cells

E. coli[®] 10G and 10GF' Cells

- Your most cost-effective source for competent cells
- Transformation efficiencies up to $> 4 \times 10^{10}$ cfu/ug
- Broad line of strains for all your cloning needs
- Direct replacement of TOP10, DH5α, DH10B, JM109, XL1-Blue strains

Endura™ Cells

- Clone unstable sequences with reliable results
- Cells of choice for lentiviral cloning and CRISPR/Cas9 genome editing
- Direct replacement for Stbl3 and SURE strains
- High efficiency: $> 1 \times 10^8$ cfu/ug (chem) or 1×10^{10} cfu/ug (electro)

Phage Display Cells

- TG1, SS320 and E2738 strains
- Perfect for antibody or peptide phage display libraries
- Highest transformation efficiencies available anywhere
- Amber suppressor and non-amber suppressor lines for maximum flexibility

OverExpress™ Cells

- OverExpress™ C41(DE3), C43(DE3), C41(DE3)pLysS and C43(DE3)pLysS strains
- Effective in expressing toxic and membrane proteins from any organism
- Cited in over 350 publications
- Combo pack containing all four strains available

ClearColi[®] Cells

- ClearColi[®] BL21(DE3) and K-12 strains
- *E. coli* plasmid and protein production strains lacking endotoxic LPS
- Ideal for mammalian cell transfection, immunogenicity and toxicity assays
- Reduce false positives in cytokine assays, improve transfection results
