

Stool Nucleic Acid Collection and Preservation System

Collect, Stabilize, Ship, Study

PRESERVE MICROBIOTA PROFILES FOR UNBIASED, REPRODUCIBLE RESULTS

- ✓ Complete, user-friendly system to collect, preserve and transport stool samples
- ✓ The preservative provides sample homogeneity eliminating sample variability
- ✓ Preserve and transport safely DNA & RNA at ambient temperature
- ✓ No cold shipping/storage needed - *hassle-free and cost effective*
- ✓ Isolate nucleic acids for any application including 16s NGS
- ✓ Robust preservation over a range of temperatures
- ✓ Customizable with various accessories for easy and safe collection
- ✓ Eliminates odor and renders samples safe and non-infectious

Stool Nucleic Acid Collection Tube Specifications

Description	Specs
Stool input	2 g
Stability of stool nucleic acids at room temperature	2 years for DNA Up to 7 days for RNA
Diameter of device	20 mm
Length of device	77 mm
Length of device without cap	76 mm
Spoon	Pre-attached to cap
Tube plastic	Transparent polypropylene

Figure 1. Integrity of Stool DNA and RNA Isolated from Preserved Stool Samples. High integrity stool DNA was isolated from preserved stool samples that were stored at room temperature for 27 months, and high integrity RNA was isolated from stool samples stored for 7 days at ambient temperature.
